1 Product Change Notice 1

Revision History

Version	Date	Description
1.0	2026-06-15	Initial Release

1.1 Notification Date

2026-06-15

1.2 Products Affected

Only the product dimensions have been optimized; no other changes are involved.

1.3 New Product Version

Only the product dimensions have been optimized; no other changes are involved.

1.4 Reason for Change

Product Structural Optimization

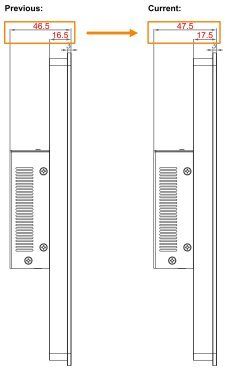
1.5 Change Description

1.5.1 New Function

None

1.5.2 Optimization

Changes	Results
LCD bezel thickness increased by 1mm	We have optimized the LCD bezel structure to provide additional clearance for internal cable routing. • LCD bezel thickness: adjusted from 16.5mm to 17.5mm. • Total product thickness: correspondingly adjusted from 46.5mm to 47.5mm.

1.6 Transition Date

Once the old version materials/products are fully consumed, the system will automatically switch to the new version. As a result, there is a transition period between the old and new versions. During this transition period, customers may still receive products with the old version appearance.

1.7 Identification Method to Distinguish Change

It can be distinguished by measuring the product thickness.
